I like it. The new game mode is great with the lend lease mechanic, and the new units and weapons are appreciated. Keep sending more DLC in different theatres of the war and I will keep buying them.. In a nutshell, adds more content to the game with new units and mechanics focused on the chinese constripts as your main force instead of the U.S. forces while cleverly mixing it up with things that are already in the game. Oh and it adds Oxen (horned cow-like animals) with machine guns on them - heck what more could you want.
